

Document Imaging Services – For Hospitals

VIRTUAL ACCESS – ANYTIME ANYWHERE

A key factor in delivering superior healthcare is the ability to capture data quickly and accurately and have it readily accessible – anytime, anywhere. The most effective way to do that is to capture it electronically.

State-of-the-art document imaging, image processing, and electronic content management technologies combined with business process management strategies, from Accentus, are providing healthcare organizations with an efficient and cost effective path away from paper-intensive and minimally automated documentation environments.

Accentus Document Imaging Solutions automate the creation and accessibility of electronic patient information, reduce healthcare administration costs, free-up much needed space, boost business efficiencies, and improve patient care.

QUALITY FRONT AND CENTER

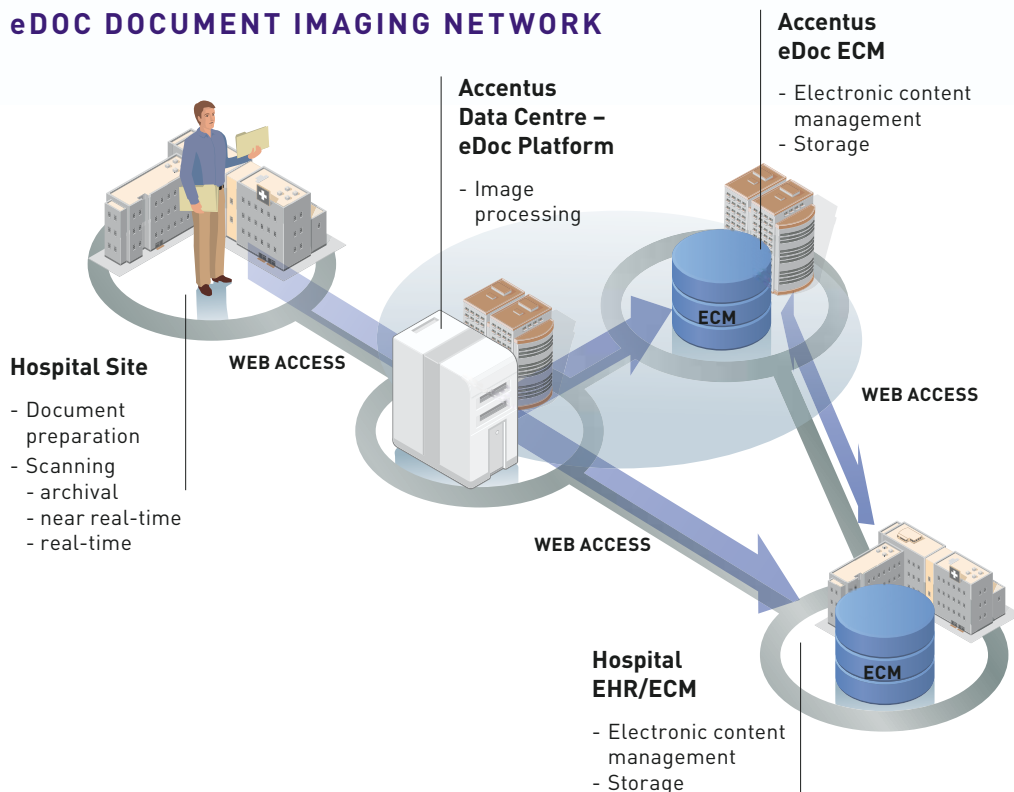

STATE-OF-THE-ART DOCUMENT IMAGING, IMAGE PROCESSING, AND ELECTRONIC CONTENT MANAGEMENT TECHNOLOGIES COMBINED WITH BUSINESS PROCESS MANAGEMENT STRATEGIES, FROM ACCENTUS, ARE PROVIDING HEALTHCARE ORGANIZATIONS WITH A QUICK, EASY, AND COST EFFECTIVE PATH AWAY FROM PAPER-INTENSIVE AND MINIMALLY AUTOMATED DOCUMENTATION ENVIRONMENTS

Accentus — Document Imaging Service

eDOC DOCUMENT IMAGING NETWORK

INTEGRATED MEDICAL DOCUMENT MANAGEMENT SOLUTIONS THAT FACILITATE BETTER PATIENT CARE.

AT ACCENTUS WE PROVIDE FLEXIBLE SOLUTIONS THAT HELP HEALTHCARE PROVIDERS EFFECTIVELY CAPTURE, ACCESS, SHARE, AND MANAGE PATIENT INFORMATION.

DOCUMENT IMAGING SERVICES – BENEFITS

Accentus offers archival, near real-time, and real-time document imaging services and brings significant efficiency gains to each step in the document imaging process — accelerating workflows, improving productivity and operational efficiency to save clients time and money.

DOCUMENT PREPARATION

State-of-the-art software eliminates the need for:

- pre-sorting;
- chart content orientation and ordering;
- chart deficiency identification; and,
- bar-coding.

Once staples, paperclips, and sticky notes are removed and the chart and its contents are assigned an identification tracking number, the documents are ready to scan. Automation of otherwise manual processes greatly reduces man-hours and the human-error factor.

SCANNING

Accentus provides low, mid-range, and high volume scanning and can process all document types, sizes, and shapes. Patented technology corrects for color, brightness, contrast, readability, and orientation often producing a scanned image that is far better than the original.

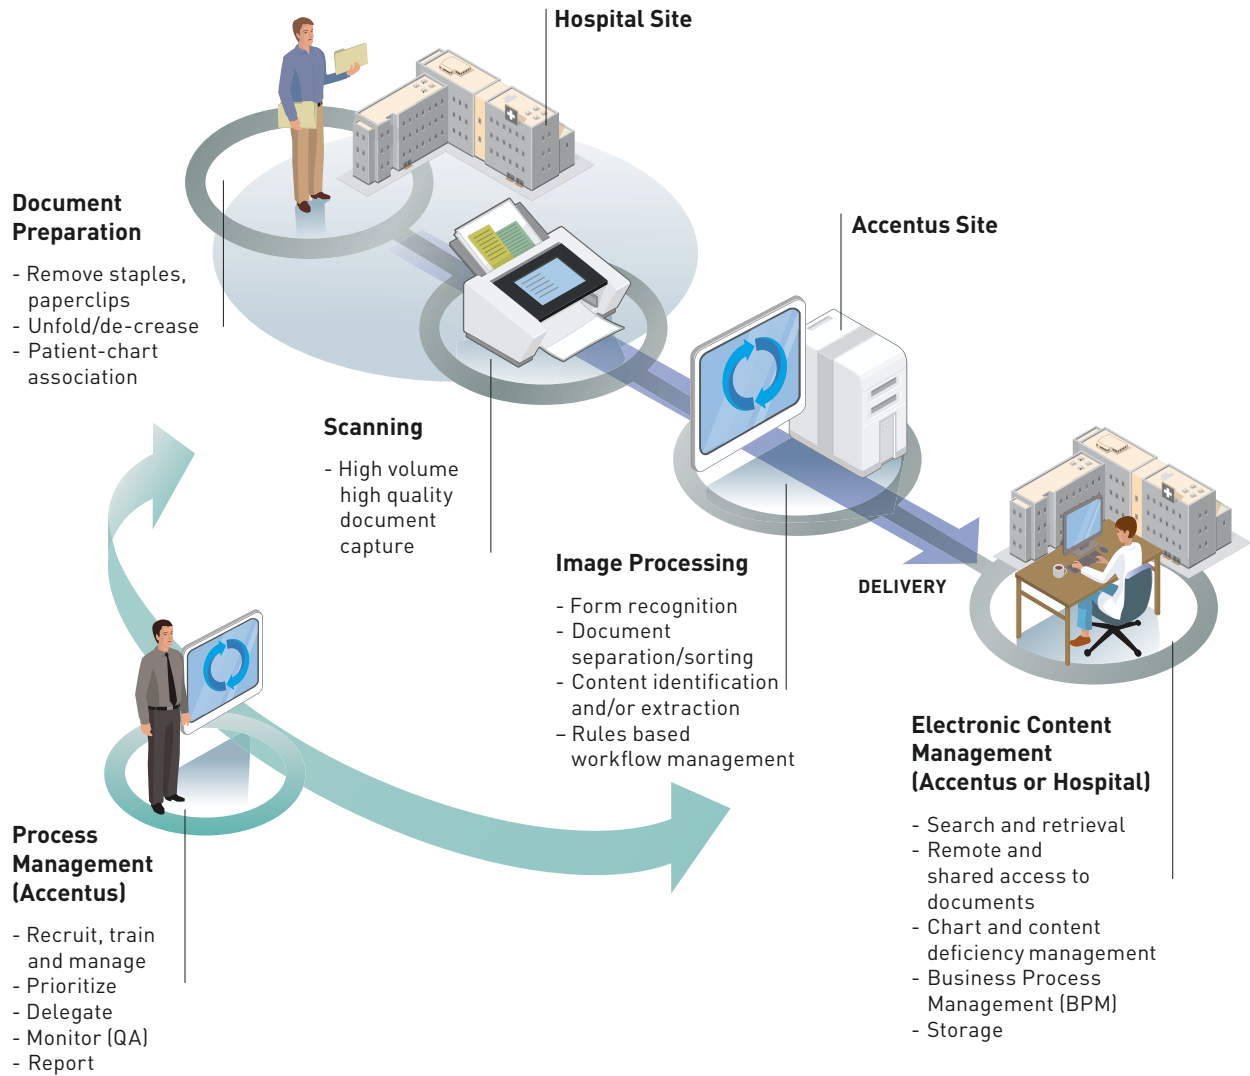

IMAGE PROCESSING

A multi-tiered image processing approach supported by industry-leading logic and intelligence software fully automates image processing. Many functions are carried out electronically, including:

- content understanding;
- indexing;
- forms recognition;
- electronic content separation and sorting;
- content identification and/or extraction;
- rules based workflow management; and,
- exception handling.

DOCUMENT IMAGING WORKFLOW

Accentus integrates manual checks and balances into each step of the document imaging process and works with client-defined metrics to ensure maximum quality, accuracy, and timeliness.

VIRTUAL ACCESS TO PATIENT DATA — ANYWHERE, ANYTIME

Accessibility and availability become of paramount importance once patient information is captured in electronic format. Accentus offers full electronic content management (ECM) functionality, through its SaaS based hosted eDoc Document Management platform. The eDoc ECM allows for search and retrieval of scanned images, secure web enabled remote or shared access to documents, and easy management of chart content deficiencies. It can add functionality to existing hospital electronic health records systems that are image-enabled or

can be integrated with those that are not — giving healthcare providers real-time, seamless access to all scanned images.

Business Process Management software further enhances eDoc's ECM capability. Healthcare organizations can greatly improve efficiency and productivity by:

- fully automating and streamlining business processes;
- electronically distributing tasks;
- implementing and enforcing business rules;
- documenting and measuring performance; and,
- accessing data for real-time and historical reporting.

INDUSTRY LEADING SERVICES

ACCENTUS OFFERS ARCHIVAL, NEAR REAL-TIME, AND REAL-TIME DOCUMENT IMAGING SERVICES AND BRINGS SIGNIFICANT EFFICIENCY GAINS TO EACH STEP IN THE DOCUMENT IMAGING PROCESS.

Why Accentus

When it comes to Integrated Medical Document Management Solutions Accentus offers clients a complete portfolio of services custom built to facilitate improved patient care.

This is why many of the leading healthcare providers in North America are choosing Accentus as their Integrated Medical Document Management partner for all of their Transcription, Document Imaging, and Coding service requirements.
